

ELEVATE

EXTERNAL TALENT MANAGEMENT PLATFORM

If your organization has trouble answering any of the following, Elevated Resources can help:

- Do you know how many temporary or contingent workers you have today?
- Do you know your total contingent worker spend?
- How many vendors do you currently rely on for your CWS talent?
- What skill set do you utilize the most?
- Do you risk an IC audit today?

Elevated Resources' ELEVATE is the first contingent talent acquisition and supply chain execution platform specifically designed for mid-market companies. Companies using ELEVATE have both expanded their access and speed-to-talent while reducing the overall cost of that talent. In tandem with Elevated Resources program management best practices, organizations quickly and easily connect demands for talent with their supply chains/labor talent pools which encompass temporary labor providers, IT service companies, professional services firms and even direct talent cloud sources.

Companies rely on ELEVATE to achieve their aggressive growth plans, support their workforce mobility objectives, and better optimize their overall workforce utilization rates.

Vendor Management

- Requirement creation and publication based on your templates
- Approval workflow management
- Vendor engagement and collaboration
- Electronic competitive bidding
- Vendor scorecards
